Reference for voice chat

Illustration of sample plugins and the slots they could fit in

Plugin → Page(down)	Share with group(through email)	Share through social media	Tag suggestions	Bookmark suggestions
Bookmark index of a user	Yes(B/SB)	Yes(B/SB)	No	Yes(B/SB)
Create/add bookmarks	Yes(B)	Yes(B)	Yes(B)	Yes(B)
Details of a bookmark	Yes(B)	Yes(B)	No	Yes(B)
Group index of a user	No	No	No	Yes(G)

B – Plugin is associated with a bookmark
SB – Plugin is associated with a set of bookmarks
G – Plugin is associated with a group. Note : Groups is just about storing email addresses

Association type of plugin

Association type of plugin	Input	Output
B	Associated bookmark details	View element
SB	Set of associated bookmark details	View element
G	The share history with that particular group	View element

Necessary conditions for a plugin to fit into a slot on a links page.
- Slots are predefined structural elements in the links webpage. Plugins can occupy them and can carry on with their stuff with or without a user triggering them.
- This check is carried out during the installation of a plugin.

Slot URI	Association type of plugin
